

Sign up to our Autumn Cohort now!

Fully-funded, Evidence-Based
Maths CPD
for Educators working with 2-4 year olds

About the training

This Maths training has been developed by the DfE and is completed over one academic term.

It includes six online modules and four seminars, one of which is held face-to-face.

During the seminars, participants check their understanding, reflect together on their own practice, and leave with practical ideas and activities to put into place in their own settings.

Important Information

We will run one cohort per term. The cohorts will be open to attendees across **Northumberland** and **Durham**.

Please bear in mind that the face-to-face session will be based centrally and all participants must be willing to travel to this session.

Session dates are yet to be determined. Spring and Summer cohorts will be announced later in the year.
